# WHY WATER TREATMENT

Apparently 70 percent of Indian population rely on ground water, depending upon the demography minerals like calcium magnesium fluoride and other toxic chemicals in unfiltered and not human friendly form gets deposited in large amounts into this water resulting in various hard water problems we face in our daily life.

## HARD WATER PROBLEMS

SKIN PROBLEMS

HAIR FALL AND DANDRUFF PROBLEMS

CLOTHES LOSSES COLOUR AND VIBRANCY

CLOGGING OF PLUMBING PIPES OVER TIME

LIMESCALE DEPOSIT ON TAPS, TILES, GLASS, KITCHEN PLATFORMS

REDUCE APPLIANCES LIFE & INCREASED ELECTRICITY COSTS

## COMPLETE WATER TREATMENT SOLUTIONS

ZYTATEK water softeners are an innovative cost effective and durable systems. Our system uses both electronic pulse and electrolytic process, which helps in not only effectively removing upto 90% hardness in water but also killing upto 99% bacteria giving neat clean conditioned soft water. "ZYTATEK" offers you three models to choose depending upon your requirement.

**ZYTA MINI**

Upto 1500 liters per hour

**ZYTA ULTRA**

1500 to 5000 liters per hour

**ZYTA TURBO**

above 15000 liters per hour

# ZYTATEK APPLICATIONS

## ● Apartments

In Apartments consumption and storage of water tanks happens in a large scale. Untimely cleaning practices result in algae formation, odour in water, clogging and rusting of plumbing pipes overtime, taps and faucets getting jammed, low pressured water flow, increase in power consumption and reduces life of water heater, washing machines, dishwasher etc

## ● Villas & Independent Houses

Hard water causes immense problems like scaling on costly tiles, granite kitchen slabs, expensive faucets. All these problems we face daily not only will degrade image of our heavenly homes but also costs us in high maintenance.

## ● Agriculture & livestock farms

In Poultry, dairy and sheep farms etc, water softener is a must have. It's very essential to give neat and clean water to our livestock. A good water softener helps in removing harmful mineral deposits and also kills 90% bacteria through UV conditioning. In Agricultural, horticultural farms problems related to clogging of drip pipes, motors, green house and polyhouse sprinklers can be very effectively eradicated using a good water softener.

## ● Industries

Any Industries which involves water usage must and should have a water softener. It dramatically reduces corrosion, improves performance and life span of expensive machinery.

## ● Features & Benefits

Stops and removes existing scaling in pipes & valves. Ensures no formation of salt marks on the floor, increases life of home appliances. Most effective on UPVC, HDPE, Copper pipes. Reduces usage of soap while bathing, washing utensils. Reduces the usage of detergent & makes clothes bright.
